The Family Fire Escape Plan Template

A free homeowner guide from firedoor.id

Choosing the Right Extinguisher

Understand the ratings

- ☐ Class A: ordinary combustibles (wood, paper)
- ☐ Class B: flammable liquids
- ☐ Class C: electrical fires
- ☐ ABC-rated covers all three — the right default for most homes

Placement basics

- ☐ At least one extinguisher per level of the home
- ☐ An additional one near the kitchen
- ☐ Check the pressure gauge periodically

Smoke Alarm Placement & Maintenance

Where they go

- ☐ Inside every bedroom
- ☐ Outside each sleeping area
- ☐ On every level, including the basement

Keeping them working

- ☐ Test monthly by pressing the test button
- ☐ Replace batteries yearly (or use 10-year sealed alarms)
- ☐ Replace the entire unit every 10 years

Your Family Escape Plan

Before an emergency

- ☐ Map two exits from every room
- ☐ Pick a meeting point outside
- ☐ Practice at night, not just during the day

Special considerations

- ☐ Assign help for young children or mobility needs
- ☐ Never go back inside once everyone is out
- ☐ Call emergency services immediately in a real fire

Is your home actually fire-ready?

Get a personalized AI fire safety checklist in 60 seconds at firedoor.id, covering the right extinguisher, alarm placement, and escape plan for your home.
